DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 3. Claims 1 6 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6,448,953 to Murade.
- 4. Regarding claims 1, 3, and 5 Murade (cols. 7 9) teaches a display device (Figs 1 4) comprising:
 - A pixel part arranged in a matrix and having a signal line (6a) arranged for each pixel string (column 7, lines 2 – 5)
 - A clock generating means (101) for generating a first clock signal (CLX) and a second clock signal (ENB1) having the same period and a smaller duty ratio (see fig. 4)

Page 3

Application/Control Number: 10/049,520

Art Unit: 2674

- A shift register (400) for performing a shift operation in synchronization with said first clock signal and outputting a shift pulse in sequence from the shift stages (ST1 to ST4)
- A first switch group (402) for sampling said second clock signal (ENB1 or ENB2 input to NAND 403) in response to a shift pulse output in sequence from said shift register (ST1 to STn input to NAND 403)
- A second switch group (301) for sampling an input video signal (VID1 to VID12) in sequence in response to said second clock signal supplied by the switches of the first switch group (X1 to Xn) and supplying the same to the signal lines of the pixel part (S1 to Sn).
- 5. Regarding claims 2, 4, and 6 Murade, as applied to claims 1, 3 and 5 above further teaches a display device wherein a display element of each pixel of said pixel part is a liquid-crystal cell (9a, column 7, lines 50 55).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Prizio whose telephone number is (703) 305-5712. The examiner can normally be reached on Monday-Friday (7:30-5:00), alternating Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe can be reached on (703) 305-4709. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
